

# Final Review: “Extreme events of snow grain size increase in East Antarctica and their relationship with meteorological conditions”

Stefanini et. al.

For publishing in The Cryosphere

## 1 General

Thank you for answering all questions and responding to all suggestions. Apologies for the long-awaited review back. All changes are positive and contribute to clear understanding in this paper. I think the title is an excellent choice, and using the term 'grain size increase' will help in literature review searching. Alongside with suggestions from referee #1 about large scale circulation impact, the extension contributes to reader understanding. The expanded discussion on SAM is satisfactory. Finally, this is a wonderful paper, and I look forward to sending it to colleagues.
